The following is an examiner's statement of reasons for allowance: The two closest pieces of prior art, Fangman et al (U.S. Patent #6,687,245) and Wilson et al (U.S. Patent Publication #2002/0009078) fail to disclose applicant's method step of a having a cue that activates the tagging of the frames as shown in applicant's Steps 72 and 77, whereby the "offer" step from the server to the terminal device includes a "TAG" command. In col. 16, lines 49 et seq. they disclose the "discover," "offer," and "request" steps. In col. 20, line 19, Fangman et al disclose the DHCP ACK step, but nowhere do they disclose "tags." Wilson et al disclose tags throughout their spec., but no where disclose that those "tags are activated in response to a cue. Rather, Wilson et al frames are tagged after they leave leaf switches S1, S2. No where does Wilson et al disclose the activation of the tags on a frame in response to a cue. No obvious combination of references found would have taught one of ordinary skill in the art to make and use applicant's method as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Creighton H. Smith whose telephone number is 571/272-7546. The examiner can normally be reached on M-F, alternate Fridays off.
